SEED contact lens

correctclean

30 mins Cleaning for RGP & Ortho-K lenses

Cleans lenses, Loosens and Removes Surface Protein Deposits after 30 mins soak without manual rubbing.

SEED contact lens

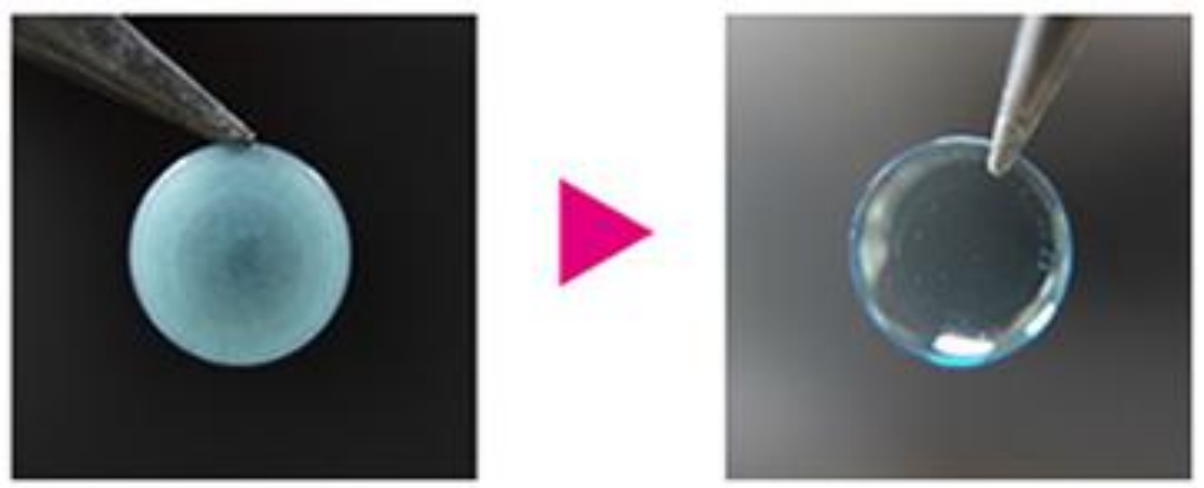

Correct Clean is a Biweekly soaking cleaning solution that strongly cleans protein stains that cannot be removed by daily lens care.

correctclean

Strong Cleaning

Before using Correct Clean **After using Correct Clean**

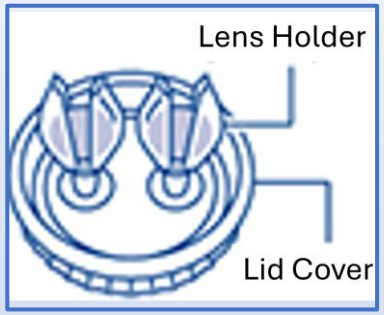

30 minutes of soaking Cleaning

- By mixing liquid A and liquid B, it generates hypobromous acid, decomposes and removes protein chain and dirt adhering to the lens surface.
- Cleaning time is 30 minutes (Do not exceed 30 mins of soaking)

How to Use correct clean

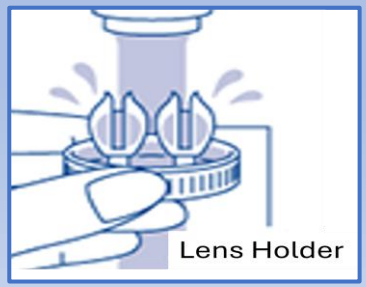

SEED

1. Wash Lens holder and rinse well with tap water.
2. Insert the right lens into the "R" and the left lens into the "L" of the lid holder of the special case.
3. Slowly pour 1 liquid A and 1 liquid B into the special case body.
4. Cover the lid with the special case body and turn it firmly to close it.
5. Shake the special case lightly 2-3 times so that the liquid in the case mixes, and leave it for 30 minutes.
6. Remove the lid and rinse the lenses with multipurpose solution or saline for 30 seconds before wearing the lenses.
7. When storing, soak lenses with multipurpose solution in the lens case you used in your daily cleaning regiment.

Summary

- Wash, clean, dry your hands.
- Do your usual daily lens cleaning process before starting this process.
- Insert lenses into the screw cap holder as provided for this process.
- Empty solution from Vial A and B into the lens container provided.
- Close the screw cap tightly containing the lenses onto the container with solutions.
- Shake the lens container gently for around 10 seconds.
- Let the lenses soak for 30 mins.
- Remove the screw cap, discard the mixture from the container, rinse lenses with saline, lens cleaning solution and place them back into your regular lens case for storage.
- Rinse and clean the lens container and let it air dry.

Important Note

- Do not spill the solutions unto your eyes or skin.
  - If you accidentally let the cleaning solution get into your eyes, rinse it under running water for 15 minutes and see an ophthalmologist immediately
- Do not use this for soft contact lens.
- Do not let your lenses soak longer than 30mins in the solutions, prolong soaking might decoloured your lenses.
- Do not let the solution spilled onto your clothes as it might decoloured your clothes.
- Use the container provided for this process.
